### Terence Tao - Wikipedia

The technical innovations range from control theory concepts to real-time wireless communication to networked control. Some of the most challenging applications include cooperative autonomous driving and industry automation. 5G and the Tactile Internet provide first technical solutions from a wireless communications perspective.

### IEEE MASS 2021 - Auburn University

As a visual artist, I find this to be a very interesting and empowering concept. This true-fan 'business model' reminds me a lot of the independent rap artist from the Bay Area: Too Short, E-40, etc began their careers by "selling records outta the trunk", bypassing major record labels and getting supported financially by local 'true fans'.
