Sip Beyond Voip The Next

However, you shouldn't directly compare SIP to VoIP, and here's why. VoIP is quite a broad term that refers to any phone call made over the internet instead of the traditional, physical telephone line. VoIP stands for Voice over Internet Protocol. SIP is one of those protocols—a specific protocol that facilitates VoIP. If VoIP refers to ...

What is SIP Trunking? (With Real-World Examples) - Nextiva

Session Initiation Protocol (SIP) is a communication protocol that manages multimedia communication such as video and voice calls. To use SIP, you need a SIP phone that establishes communication over the internet. Unlike traditional phone systems, SIP phones rely on internet technology to make secure and reliable calls.

What is a SIP Phone & How Does It Work? - Nextiva Blog

SIP ALG helps for outgoing calls but it's not the best for incoming calls. Endpoints registered under the SIP proxy still have to maintain a connection. They're called "keep-alives" and only function with a NATed endpoint. This forces the SIP ALG to rewrite the request, causing the NAT to go undetected. The SIP ALG could also break SIP ...
